Monday's Ladies group donates over \$2000 to Horton Community Centre

Snowplow FACTS from public works!

- A snowplow can measure up to 16 feet wide with its wing extended — that's the width of 3 cars.
- The driver's visibility is greatly reduced because of the equipment.
- The optimal spreading speed is 40 km/h. The maximum plowing speed is 50 km/h.

What to do near snowplows?

- When meeting a snowplow coming the opposite way, move to the right and slow down. The blade encroaches on your lane and will stay there
- If you pass, do so carefully and without lingering beside us. NEVER, EVER, EVER pass on the right. NEVER!
- Remember that driver visibility is poor and drivers are constantly being blinded by snow and water splashing onto our windows.
- At intersections, give space to maneuver. If snowplows are stopped, take time to assess whether it's safe to proceed; come to a full stop and make sure you are visible.

- Be visible. Keep your headlights on; don't rely only on daytime running lights.

Each week the Monday Ladies group gathers freely at the Horton Community Centre to take part in Heritage Crafts from 9am-2pm. There is everything from quilting to painting taking place in our cozy centre that many call "their 2nd home". There is comradery and laughter, story telling, compassion and encouragement! There is also a deep love for community in the ways that our group of 40 ladies gives back. Each week there is a 50/50 which this was contributed a \$1000 donation towards the upkeep of the Horton Community Centre. In addition the ladies yearly quilt raffle this year impressively raised over \$1000 donation in ticket sales - the winner took home a group effort quilt. Join us any Monday, no registration needed!
